

### How to use the Walsall Local History Centre census surname indexes away from the Centre.

Each entry in the Centre's surname index consists of a fiche number and a page number. The fiche number is a number that the Centre allocated to the census fiches that cover the modern metropolitan borough and is not a reference that has any meaning outside the Centre. To find the entry that you want at the Family Records Centre in London, at Stafford Record Office, other West Midland offices or to order the microfilm at one of the Mormon libraries worldwide you will need to use the tables below to convert our fiche number into the Public Record Office piece number. As an example an entry such as:-

Surname	Fiche	Page
SMITH	324	5A

would give you a P.R.O reference of HO 107/2022 page 5A

Please also note that what the Centre has called a page reference is technically a folio number. This is the large stamped number that appears every other page, **not** the smaller printed number that appears on every page. The page on which the folio number is stamped we have called 'A', the unstamped following page we have called 'B'.
