

## Health and safety at the site questionnaire

If an Inspector will visit the site(s), they will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site and any land or building that the Inspector will need to enter. Please supply any additional information on a separate sheet of paper

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required, and will this be supplied at the site?

Some areas of the common are uneven and have bushes and bramble which will require normal PPE ie safety boots, eye protection by way of safety goggles, high visibility trousers to protect personal clothing, a hard hat as some of the areas have low branches and high visibility jacket.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

No, the existing common is used by dog walkers however observation has found that they are usually on a lead.

3. Is the site remote and/or can it be seen from other occupied buildings/property/public land/roadside?

The site is accessible form the highway and can also be viewed from the highway footpath.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

Yes

5. Are there any areas that require specialist equipment or training for access – any confined spaces?

No

6. Are there any dangerous pieces of equipment or substances stored at the location?

No

7. Is there any likelihood of exposure to chemicals, asbestos, radiation or are there any other risks, requiring the use of Personal Protection Equipment, which may affect the health & safety of the Inspector? (Asbestos is referred to directly as it was present in buildings built before it was banned in 1977).

No additional protective equipment is required other than the general PPE mentioned in question.

8. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

Due to the narrow carriageway both at Norton Road (location of the bridge) and Lichfield Road (the exchange land); it is advisable that vehicles used when visiting the site are parked off road on adjoining land or the along one of the side road.
