

EARLY HELP IS EVERYONE'S RESPONSIBILITY

The Early Help Partnership **ACTION** Campaign

Early Help is a partnership approach, not a provision and very much relies on local services working together with families.

We know that by working together to support families, providing help at the earliest opportunity and eradicating silo working prevents children and young people from entering the care system, increases their chances to have a 'good' life, reduces the likelihood of involvement in crime and helps families into work.

Our ACTION campaign will:

- Raise awareness
- Provide training
- Build capacity and knowledge
- Help us work together

Who's it for?

The offer is across ALL practitioners in Walsall who work with, support or come into contact with children, young people and families, including contractors, housing officers, clean & green practitioners, and private companies.

How does it work?

The Early Help partnership will meet with your service and your teams to deliver awareness and training so that everyone can be part of making Walsall a better place where children, young people and their families don't just 'avoid poor outcomes' but have opportunities, ambitions and thrive.

Please be a part of this, make a difference.

For more information or call **0300 5552866** and speak to the Early Help practitioners.
